QA Bond Test Tools

WIRE PULL HOOKS

A hook is placed underneath the wire and pulled until the bond breaks (destructive testing) or a certain force is attained (non-destructive testing).

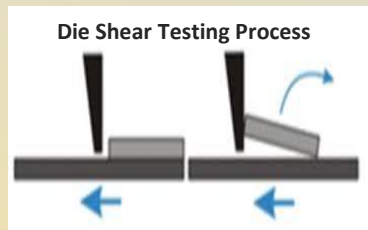

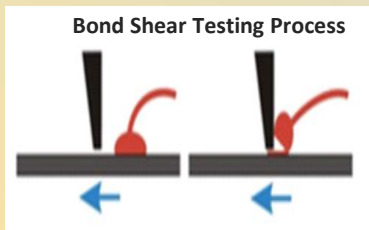

MICRON Wire Hooks are created using the most recent advancements in material technology and have formulas that are specifically made for application in the semiconductor industry.

SHEAR TOOLS

Ball shear and die shear are the two most common types of shear tests.

MICRON manufactures high-performance Shear Tools that are long-lasting. Suitable for application in Ball & Die Shear Test Equipment.
